Louis

I wanted to follow-up with you in regards to your recent inquiry to the Board of County Commissioners about concerns related to the new Legacy Trail Extension HAWK crossings.

Sarasota County is working with both Florida Department of Transportation and the Engineer of Record on evaluating these intersections , their uses and any appropriate changes recommended by the Engineer of Record.

In the meantime we are working with the Engineer of Record and our Communications Department to develop some additional signage at these intersections to help with education on appropriate use. We will also continue to work with our law enforcement partners on enforcement and strategies for overall public communication.

Thank you

Nicole
